

OPTIMIZED FOR TOMORROW

Volvo Penta's Stage V solution is designed especially to meet the demands of tough off-road applications, complying with emission standards while ensuring maximum engine efficiency. Optimized productivity, no compromise.

The engine and exhaust aftertreatment system are developed together as a complete, single-supplier package. It's a solution that makes life easy for OEMs and brings ease of operation, fuel efficiency and uninterrupted productivity to a wide range of construction applications.

And the Volvo Penta global service and support network is always there to back you up. www.volvopenta.com/stagev
